## **Data Flow Diagrams:**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

## **User Stories**

Use the below template to list all the user stories for the product.

| User Type                  | Functional<br>Requirement<br>(Epic) | User Story<br>Number | User Story / Task   | Acceptance criteria                                       | Priority | Release  |
|----------------------------|-------------------------------------|----------------------|---|---|----------|----------|
| Customer<br>(Mobile user)  | Registration                        | USN-1                | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard                       | High     | Sprint-1 |
|                            |                                     | USN-2                | As a user, I will receive confirmation email once I have registered for the application                   | I can receive confirmation email & click confirm          | High     | Sprint-1 |
|                            |                                     | USN-3                | As a user, I can register for the application through Facebook  | I can register & access the dashboard with Facebook Login | Low      | Sprint-2 |
|                            |                                     | USN-4                | As a user, I can register for the application through Gmail   | Login through gmail                                       | Medium   | Sprint-1 |
|                            | Login                               | USN-5                | As a user, I can log into the application by entering email/ username & password                          | Login through the registered username and password        | High     | Sprint-1 |
|                            | Dashboard                           | USN-6                | After logging in I should be able to navigate to different menu   | Edit the schedule   | Medium   | Sprint-2 |
|                            |                                     | USN-7                | View of the updating prescription menu  | Update the prescription in accordance with the physician  | High     | Sprint-2 |
|                            |                                     | USN-8                | I should be able to book an appointment with the physician  | Configuring my schedule to book the appointment           | Medium   | Sprint-2 |
| Customer Care<br>Executive |                                     | USN-9                | I should be able to redirect or guide the user when in need   | Have a complete knowledge on how things work around       | Medium   | Sprint-4 |
| Administrator              | Admin                               | USN-10               | I should be able to manage and align the entries of the users   | To take analytics on the users                            | Medium   | Sprint-3 |
|                            |                                     | USN-11               | I should be able to configure a new alert mechanism in case of discrepancies or emergencies               | Should be the one to look onto the functionalities        | High     |          |
